

IAQOS Bolzano Campus

A.A.A We are looking for 15 persons under 35, interested in culture, social innovation, design&art, urban regeneration and technologies - not necessarily with I.T knowledge - to bring IAQOS Bolzano to life.

Is it possible to co-create an Artificial Intelligence that speaks with the city and its inhabitants, and that can offer new possibilities of relations and connections between citizens? We are going to experiment this in our Campus, completely free of charge, that will take place both physically and virtually and will address the following themes:

- > Introduction, ethical frame, bases of A.I, analysis of data
- > Research on users, analysis of needs, brainstorming of ideas and creation of a proposal
- > Online tutoring and feasibility studies
- > Development of IAQOS, software + hardware
- > Impact assessment and first test
- > Implementation of IAQOS
- > Test and analysis of the results
- > Final event and public presentation of IAQOS

MENTORS

ANDREA ZANINELLO
Editor and Language
Scientist

FEDERICO BOMBA
Sineglossa Founder
and CEO

TOMMASO SORICHETTI
Sineglossa User
Experience Designer
